

Sensear Charging Rack

A convenient charging solution for large scale operations

• Communication • Awareness • Protection •

Sensear's Charging Rack is a heavy-duty industrial charging solution that allows for charging up to 45 Headband or Behind-the-Neck style headsets or up to 24 helmet mounted headsets. This is a great solution for companies with numerous headsets in operation at any given time on multiple shifts and/or for plant tours and training facilities.

Keep your headsets ready to go for your next work group, tour or training group, so workers, guides and participants or teachers and students can benefit from all of the great features these headsets have to offer. Including Sensear's industry-leading SENS® technology that enhances speech and suppresses background noise so users can communicate safely and effectively in noisy environments.
